PROFESSIONAL SUMMARY

Cum Laude Computer Science graduate with hands-on experience in cybersecurity, software and API development, and business operations. Developed security automation and vulnerability-monitoring capabilities during a professional cybersecurity internship, working with Python, Git, Red Hat Enterprise Linux, and cloud-based environments. Brings a combination of technical problem-solving, documentation, troubleshooting, and real-world operational experience. Expanding skills in applied AI, SQL, automation, and AI-assisted development through independent learning and projects, with a focus on using technology to solve practical business problems.

EDUCATION & CERTIFICATIONS

Florida International University | Miami, FL

B.A. Computer Science, Cum Laude | Dec. 2024 | GPA: 3.69/4.0

National Security Studies Certificate | Cyber Intelligence & Information Policy Certificate

Miami Dade College | Miami, FL

A.A., Highest Honors | 2021

TECHNICAL SKILLS

Programming & Data: Python, Java, JavaScript, SQL, Bash

Tools & Platforms: Git, Postman, AWS, Red Hat Enterprise Linux, Elastic SIEM, Microsoft Office, ArcGIS Pro

Security: CVE Analysis, Vulnerability Prioritization, CISA KEV Catalog, MITRE NVD

Technical Concepts: API Development, Process Automation, Systems Integration, Web Development

AI & Emerging Technology: AI-Assisted Development, Generative AI Tools, Prompt Design

PROFESSIONAL EXPERIENCE

Sabel Systems Technology Solutions | COE Intern

Remote (FL) | June 2026 – August 2026

- Built KEV-automation-v1.py, a Python-based security automation script extending the team's existing CVE monitoring pipeline with CISA's Known Exploited Vulnerabilities (KEV) catalog integration in a Red Hat Enterprise Linux cloud environment.
- Integrated daily MITRE CVE data with project-specific vendor information and CISA KEV data to identify and prioritize vulnerabilities relevant to monitored systems.
- Developed a decoupled KEV monitoring process that maintained daily catalog snapshots, identified newly added known-exploited vulnerabilities, and enhanced outputs with KEV priority tagging and direct NVD references.

Firehouse Subs – Franchise Owner / Operator

Johns Creek, GA | May 2025 – April 2026

- Owned and managed day-to-day franchise operations, including staffing, inventory, vendor coordination, customer service, and operational decision-making.
- Monitored sales, order volume, product demand, inventory levels, and labor trends to guide operational and staffing decisions.
- Analyzed sales and peak-time patterns to forecast demand, manage inventory, reduce waste, and improve day-to-day efficiency.

PROJECTS

APEX | Product Owner & AI-Assisted Developer | 2026

- Built a full-stack sports analytics platform that compares live odds across 35 sportsbooks, estimates margin-free fair prices, and evaluates opportunities using expected value and supporting market data.
- Led AI-assisted development using Claude Code and OpenAI Codex, defining requirements, reviewing implementations, testing functionality, and coordinating development across 27 API routes and 25 database tables.
